ESSENTIAL INFORMATION FROM INDUSTRY LEADERS

WHICH GOAL  
IS RIGHT  
FOR YOU?

- SOCKETED
- + FREESTANDING
- ALUMINIUM
- + STEEL

EXPERT  
ADVICE

TOGETHER, WE MAKE THE GAME

# STEP 1

## SELECT YOUR GOAL SIZE

Your goal size is mainly determined by the age group using the equipment. Younger children will play on smaller pitches and require smaller goals to focus on skill development. As they get older, larger goals are used to introduce the adult game.

### THE FA OFFICIAL GUIDELINES FOR THE RIGHT SIZE OF GOAL FOR EACH AGE GROUP ARE:

<b>FULL SIZED</b>		<b>UNDER 15s AND OVER</b> 24 x 8ft / 7.32 x 2.44m
<b>YOUTH SIZED</b>		<b>UNDER 13s &amp; UNDER 14s</b> 21 x 7ft / 6.40 x 2.13m
<b>9V9</b>		<b>UNDER 11s &amp; UNDER 12s</b> 16 x 7ft / 4.88 x 2.13m
<b>MINI SOCCER</b>		<b>UNDER 7s - UNDER 10s</b> 16 x 6ft / 4.88 x 1.83m
		<b>UNDER 7s - UNDER 10s</b> 12 x 6ft / 3.66 x 1.83m
<b>5-A-SIDE</b>		<b>ALL AGES</b> 16 x 4ft / 4.88 x 1.2m
		<b>ALL AGES</b> 12 x 4ft / 3.66 x 1.2m

## STEP 2

## SELECT YOUR GOAL TYPE

Football goals come in two types, either socketed or freestanding. Which type you go for will depend on where and how you will use your equipment.

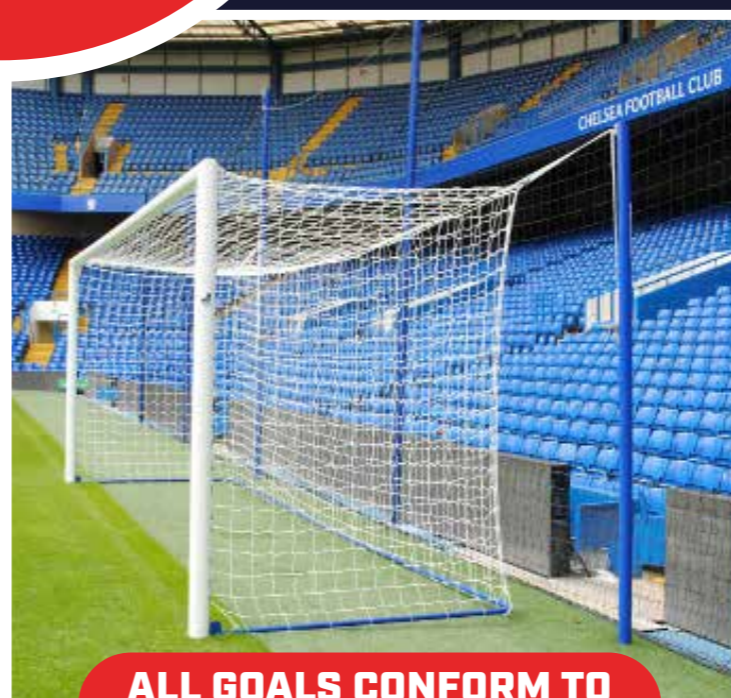

### FREESTANDING OFFERING ULTIMATE VERSATILITY FOR MOVING YOUR GOALS

These offer unparalleled flexibility and ease of use. Whether you play on an enclosed synthetic pitch or use a local authority ground there's a freestanding goal for you.

Designed to be moved freely, these goals either fold or have wheels

Self-weighted freestanding goals don't require anchors

Great for shared pitches.

### SOCKETED FIT FOR THE PROS AND FIXED IN PLACE

Socketed goals come with sleeves that you concrete into the ground or fix in place with our DIY Ground Screw which removes the need for digging and concrete all together.

This type of goal is used heavily in the adult game (24x8ft goals) and is the default choice for league clubs and open pitches.

Great for quick play and designed to be left up for long periods of time

No need for anchors or weights

Quick release version available.

**ALL GOALS CONFORM TO BSEN784 AND BSEN16579**

# STEP 3

# SELECT YOUR MATERIAL

At MH Goals we manufacture our goals at our headquarters in Suffolk from either aluminium or steel. Both materials have their benefits, see below:

## ALUMINIUM LIGHTWEIGHT AND EASY TO MOVE

Doesn't corrode

All MH Goals aluminium goals come with welded corners as aluminium goals that have only been cut or mitred have extremely sharp edges and can be unsafe

These aluminium goals come with a net hook channel for the enclosed or holdfast net hook system.

## STEEL RELIABLE STRENGTH

Great value as they are less expensive than aluminium

The 76mm goals are excellent for open pitches

Exceptionally hard wearing and long lasting.
